

Diploma In Software Engineering (FMD-1)

(Developers Stack Academy)

Web Project (Assignment 1)

Objective:

Recreate the webpage design from the given template using only HTML and CSS.

Assignment Link: [templatemo_578_first_portfolio](#)

Instructions:

1. Set Up Your Project:

- Create a new folder named `MyPortfolio`.
- Inside this folder, create the necessary files: `index.html` and `styles.css`.

2. Replicate the Webpage:

- Use the provided link as a reference: [templatemo_578_first_portfolio](#).
- Analyse the structure and design of the webpage.
- Recreate the layout using basic HTML elements:
 - **Header:** Include navigation and title.
 - **Sections:** Add sections like "About," "Portfolio," "Contact," etc., as shown in the template.
- Use appropriate HTML tags for headings, paragraphs, lists, and forms.
- Implement the design using CSS:
 - Match the colours, fonts, spacing, and overall styling.
 - Apply layouts using Flexbox or CSS Grid as needed.
 - Ensure your design is responsive, working well on different screen sizes.

3. Final Touches:

- Double-check that your version closely resembles the provided template.
- Make sure all elements are properly styled and aligned.

4. Submission Process:

- The submission process will be explained during the next class session.

Grading Criteria:

- **Accuracy:** How closely your webpage matches the template.
- **HTML Structure:** Correct use of HTML elements.
- **CSS Styling:** Effective replication of the template's design using CSS.
- **Responsiveness:** The page should be responsive across different devices.
- **Overall Presentation:** The final look and functionality of your webpage.

Deadline: 2024/09/06 (Before 6PM)
